

Team 6 (Servalink) Sprint 0 Deliverables

Group members: Jonathan Emery, Paul Nhan, Chance Pearson, Michael Williams, David Yu

Project repository: <https://github.com/CMPUT401Servalink/servalink>

Task planning done in sprint 0:

- Arranged work done for the requirements document:
- User stories: All members
- Story map: Michael, David
- Storyboards/related user stories: Jonathan
- Release planning: Chance
- Glossary: Paul
- Resources: Michael, David
- Requirements documentation: All members

Iteration plan for sprint 1:

- US stands for user story
- The points in effort estimates indicates the approximate amount of required days of development effort.

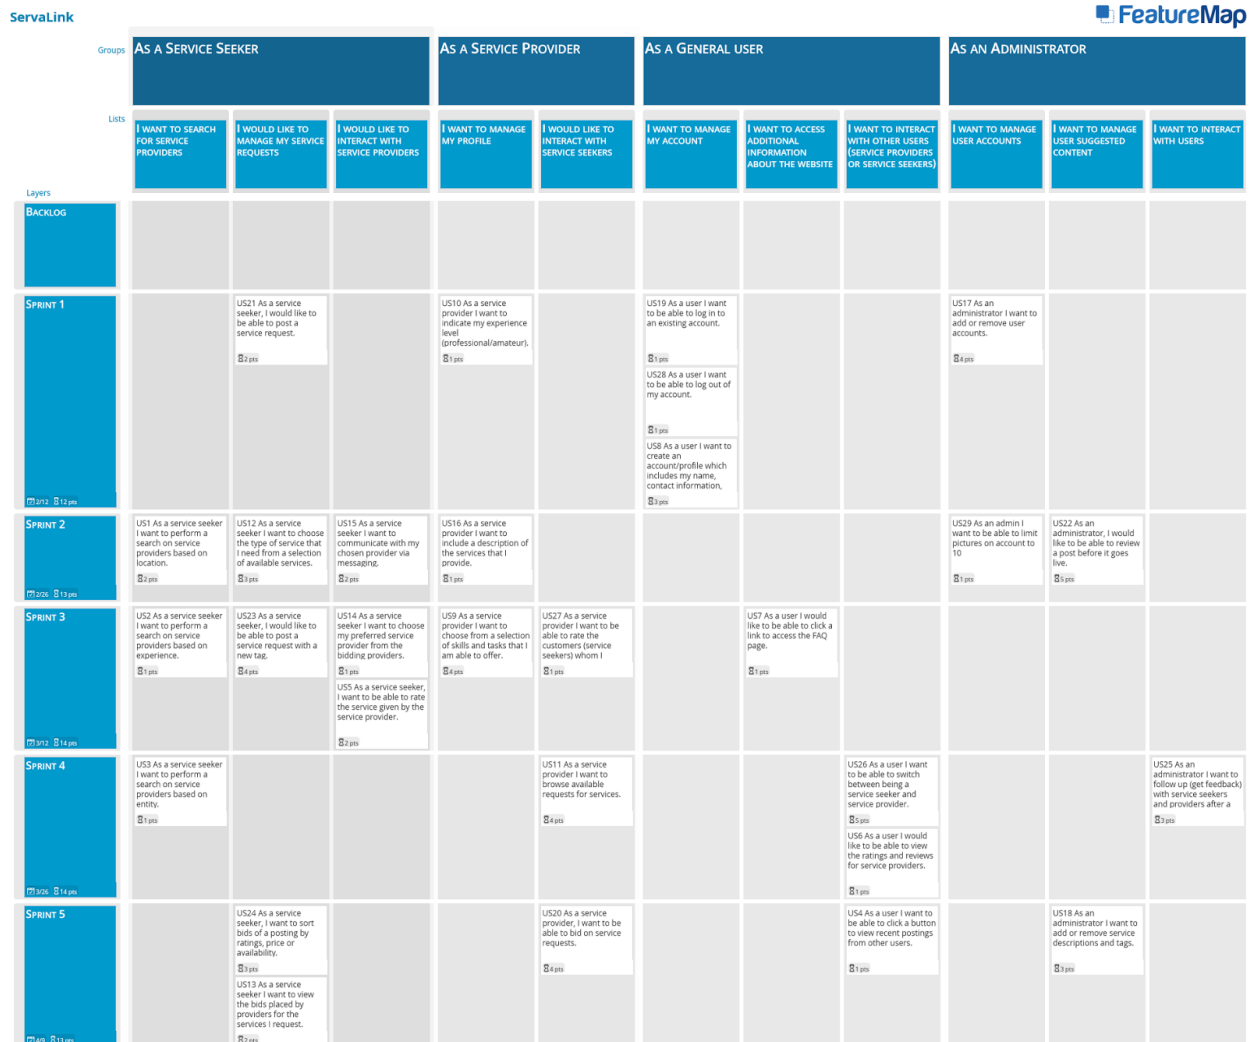

User story descriptions:

1. User story 8: As a user I want to create an account/profile which includes my name, contact information, and photo or company logo.
2. User story 10: As a service provider I want to indicate my experience level (professional/amateur).
3. User story 17: As an administrator I want to add or remove user accounts.
4. User story 19: As a user I want to be able to log in to an existing account.
5. User story 21: As a service seeker, I would like to be able to post a service request.
6. User story 28: As a user I want to be able to log out of my account.

Iteration plan		Planned/Estimated			Actual			
Milestone	Activity	Start	End	Effort	Start	End	Effort	Assigned
Iteration 1	US 8	Jan 31	Feb 13	3	N/A	N/A	N/A	Paul
	US 10	Jan 31	Feb 13	1	N/A	N/A	N/A	Michael

	US 17	Jan 31	Feb 13	4	N/A	N/A	N/A	Chance
	US 19	Jan 31	Feb 13	1	N/A	N/A	N/A	David
	US 21	Jan 31	Feb 13	2	N/A	N/A	N/A	Jonathan
	US 28	Jan 31	Feb 13	1	N/A	N/A	N/A	David

Updated release plan:

Sorry for the very small image attached here, to see the full size image of our release plan see this link: <https://www.featuremap.co/maps/mswillia/ServaLink> or see the full size image of it attached with this report.

Client demo

Client demo for this iteration consisted of a walk through of the user stories in conjunction with the story board slides, indicating user stories related to individual elements of each screen of the application.

Management requests/feedback addressed

For the first iteration, no additional requests were required beyond the initial requirements as indicated in the requirements document.

Meeting minutes:

Friday, January 16 - Client Meeting

All group members present

- Talked about the project more in detail and discussed hardware related items. We asked about getting more information on platform and how they wanted the website to start user stories. We then talked about a good meeting time to rejoin. This we found out will be 21st of January, 2015 at 8:00 AM MST. At this time we will start the work on the project.
- Conclusion: In Closing we met the client in a formal setting. Discussed the project and set a meeting time for next Wednesday.

Friday, January 23 - Developer Meeting

All group members present

- Discussed preparation for requirements document submission
 - Subdivision of functionality into primary functions: Service provider, seeker, admin, system
- Discussed time estimations, using story points vs time, overall story point estimation per sprint
- Determined story points for each user story: 1 point = 1 day work/person
- Kiana (TA) joined meeting, discussed:
 - Providing a repo, submitting pdf deadline, project manager, estimates of tasks
 - Suggest progress estimation for next sprint, burndown charts
 - Discussed Sprint 0, getting feedback from client and peers, followed by repairs
- Arranged work contribution for requirements document:
 - User stories: all members
 - Story map: Michael, David
 - Story boards/related user stories: Jon
 - Release planning: Chance
 - Glossary: Paul
 - Resources: Michael, David

- Requirements documentation: all members
- Dr. Wong joined meeting, made inquiries about:
 - Time required per story point
 - Recommended: determining the number of points required per sprint
 - Recommended: determine which stories will be implemented in each sprint, also to be discussed with client to set scope

Friday, January 30 - Client Meeting

All group members present

Client discussion:

- Next iteration
- How we are dividing up work - tasks
- Inquired whether website will be functional or will have design elements as well
 - Team indicated it will be both
- Another spark developer has similar product, wants to work with clients on this project
 - Client demoed page
 - wants to charge percentage of the job - different model than ServaLink
 - concerns regarding model, retaining intellectual property
 - discussed that client would like to stick to path, not compromise on design
- Logos and graphic design
 - Client will work on providing a logo
 - Discussed acquiring a designer for graphics
- Clients have done quick read through requirements document
 - Didn't find any issues that require change presently
- Discussed Sprint 1
 - Primarily user account set up
- Client asked about meeting requirements in a timely manner
 - What would be dropped if necessary?
- Creation of fake user database required
- Discussed domain, providers
 - Would like SQL DB backend
- Arranged next client meeting Feb 11 at 8:00 a.m.

Kiana (TA) discussion:

- Checked on Sprint and requirements for Jan 30 submission
- Recommended fulfilling checklist points
- Discussed requirements for Sprint 0
- Documents can be on the repo if complete, no extra pdf required
